Gus R. Douglass
Agriculture Commissioner

To You Interested In West Virginia Agriculture

Concern about reducing governmental expenses will cause changes in our farm programs. None of us know what direction they will take. We must realize that with the current problems in the agricultural economy there could be some very serious consequences if proper action is not taken. Our ability to produce agricultural goods in such abundance creates a problem. For some commodities disposition of surplus production by export creates further problems because the export prices are less than cost of production. The paradox is that often the more a farmer produces the less net income he receives per unit. A bushel of wheat today sells for less than $3.50 as compared with $1.00 in 1935. This increase is less than half that shown by the Consumers' Price Index. The farmer has kept himself solvent by increasing productivity. No other major segment of our economy has increased its productivity like agriculture has.

Some complain about the farm subsidies. It is apparent that they are not aware of the part subsidies play in keeping U.S. food costs at the lowest percentage of income of any country in the world. We have such an abundance of high quality food and still feed a large part of the world. The processors and transportation industry play a tremendous part in getting our food to us at a reasonable price. Without good statistics on the expected production neither the processor nor the transportation industry could be prepared to handle the production as efficiently as they do.

That's why reliable crop estimates are so important. Without the data collected by the Crop and Livestock Reporting Service the small producers would be at the mercy of the market. The large producers and large industry have their organizations for securing needed information. Good information on production helps to stabilize prices.

I wish to thank the West Virginia farmers and agribusiness people who voluntarily provide basic information for this publication. I also wish to acknowledge the County Tax Assessors for their agricultural reports submitted each year.

The West Virginia Department of Agriculture's part in this publication is designed to help provide the best statistics possible for the support of agriculture.

I am

Very truly yours,

Gus R. Douglass

Gus R. Douglass
Agriculture Commissioner

To our Friends and Subscribers

For more than thirty years I have been a part of the organization collecting agricultural statistics for the states and nation. Over seventeen of them have been in West Virginia. Conditions have changed. Many of our current agricultural problems have been with us for many years. Attempts at solving them have for the most part been only temporary. Our government policies seem to be cyclical. Basically, there seems to be a lack of knowledge of or interest in agriculture among a large part of our population. Perhaps it's apathy or disinterest, but whatever, there needs to be a change. Too many people in this country today do not know the source of their food, or if they do they don't know what is involved in producing it. Agricultural production is the basis of our survival. Many people have great fear of man made disasters, but a famine can cause much more suffering and misery.

West Virginia Agricultural Statistics is published to inform the people of what and where agricultural products are produced in West Virginia. The cooperations between the West Virginia Department of Agriculture and Statistical Reporting Service of U.S.D.A. makes possible the collection and publication of these data. It is our goal to provide helpful and useful information to all, the consumer, the producer, the processor and any others who may have an interest.

My appreciation is extended to those who helped make this publication available to you: The office staff - Mike Craig, ASIC; Mike House (now in D.C.); Veronica Jenkins (now with W.V.D.A.); Greg Stamm, Nancy Say and Arnold Wilcox, Statisticians; Kathy Leas, Computer Programmer; Ramona Lewis, Support Supervisor; Geraldine Kent and Kathleen Krise, Statistical Clerks; Joe Ann Bowman, Mailroom Clerk; Carol Mace, Word Processor Operator and Janice Brandt and Lynn Hamrick, part-time office personnel: To our NASDA enumerators who collect much of our data: To the County Tax Assessors who provide reports for their county: and to the Crop, Livestock and Price Reporters who voluntarily provided the basic information presented in this publication.

George M. Ferrell
Agricultural Statistician

1/ A FARM IS A PLACE AS OF JUNE 1 THAT SELLS OR COULD SELL $1,000 OF AGRICULTURAL PRODUCTS DURING THE YEAR 2/ PRELIMINARY

CROP WEATHER CONDITIONS - 1983

THE WINTER OF 1983 BEGAN WITH ABOVE AVERAGE TEMPERATURES AND BELOW AVERAGE PRECIPITATION. TEMPERATURES AVERAGED ABOVE NORMAL THROUGH FEBRUARY AND MARCH. PRECIPITATION WAS NORMAL DURING THOSE MONTHS.

SPRING STARTED WITH ABOVE AVERAGE TEMPERATURES WHICH FELL TO BELOW NORMAL IN MAY BUT JUNE TEMPERATURES AVERAGED NEAR NORMAL. PRECIPITATION WAS ABOVE AVERAGE IN APRIL, BELOW NORMAL IN MAY AND NORMAL IN JUNE.

THE SUMMER MONTHS WERE CHARACTERIZED BY ABOVE AVERAGE TEMPERATURES AND BELOW NORMAL PRECIPITATION. THIS DROPPED THE SOIL MOISTURE TO BELOW ADEQUATE IN MOST AREAS OF THE STATE. THIS LIMITED PASTURE QUALITY AND AFFECTED MOST CROPS.

THE WARM DRY CONDITIONS CONTINUED THROUGH THE LATE FALL AND EARLY WINTER. NOVEMBER BROUGHT ABOVE AVERAGE TEMPERATURES BUT ABOVE AVERAGE PRECIPITATION WHICH CONTINUED THROUGH DECEMBER. LATE DECEMBER BROUGHT RECORD SETTING LOW TEMPERATURES.

WEST VIRGINIA 1983 FIELD CROP PRODUCTION

WEST VIRGINIA HAD 766,200 ACRES OF PRINCIPAL CROPS HARVESTED BY FARM OPERATORS IN 1983. THIS IS A 1 PERCENT DECREASE FROM THE 1982 CROP YEAR.

CORN ACREAGE HARVESTED FOR ALL PURPOSES TOTALED 102,000 ACRES, DECREASING 14 PERCENT FROM THE 1982 CORN CROP. ACREAGE HARVESTED FOR GRAIN DROPPED 25 PERCENT FROM LAST YEAR TO 60,000 ACRES. YIELD WAS 78 BUSHELS PER ACRE, DOWN 20 BUSHELS FROM 1982. GRAIN PRODUCTION IN 1983 FELL BY MORE THAN 3 MILLION BUSHELS TO 4.68 MILLION. ACREAGE HARVESTED FOR SILAGE WAS UP 3,000 ACRES FROM THE PREVIOUS YEAR TO 40,000. SILAGE YIELD WAS 13.5 TONS PER ACRE, THREE TONS LESS THAN LAST YEAR. THE DROP IN YIELD REDUCED PRODUCTION TO 540,000 TONS, 71,000 TONS OFF OF THE 1982 FIGURE.

TOTAL SMALL GRAIN AREA HARVESTED, AT 22,000 ACRES, WAS 4 PERCENT LOWER THAN IN 1982. WHEAT ACREAGE HARVESTED TOTALED 9,000, UNCHANGED FROM LAST YEAR. YIELD WAS 42 BUSHELS PER ACRE, 7 HIGHER THAN ONE YEAR AGO. WHEAT PRODUCTION IN 1983 INCREASED 63,000 BUSHELS TO 378,000 BUSHELS. THE OAT CROP COVERED 9,000 ACRES, DOWN 10 PERCENT FROM THE PREVIOUS YEAR. YIELD INCREASED ONE BUSHEL TO 52 BUSHELS PER ACRE. OAT PRODUCTION DROPPED TO 468,000 BUSHELS, 42,000 LESS THAN IN 1982. BARLEY, AT 4,000 ACRES, WAS EVEN WITH LAST YEAR'S HARVESTED ACREAGE. YIELD GAINED 8 BUSHELS TO 60 BUSHELS PER ACRE. PRODUCTION TOTALED 240,000 BUSHELS, UP 32,000 BUSHELS FROM 1982.

TOBACCO ACREAGE HARVESTED JUMPED TO 2,200 ACRES, 10 PERCENT MORE THAN LAST YEAR'S CROP. YIELD DROPPED 85 POUNDS TO 1,710 POUNDS PER ACRE. PRODUCTION TOTALED 3.76 MILLION POUNDS, UP 172,000 POUNDS FROM THE PREVIOUS YEAR.

ALL HAY AREA HARVESTED INCREASED 2 PERCENT TO 640,000 ACRES. YIELD DECREASED BY 4 PERCENT TO 1.35 TONS PER ACRE. PRODUCTION FELL 18,000 TONS TO 864,000 TONS. ALFALFA AREA HARVESTED JUMPED 11 PERCENT TO 100,000 ACRES. YIELD INCREASED BY 4 PERCENT IN 1983 TO 2.70 TONS PER ACRE. ALFALFA PRODUCTION, AT 270,000 TONS, WAS 36,000 TONS GREATER THAN ONE YEAR AGO.

FRUIT PRODUCTION 1983

GENERAL: APPLE AND PEACH PRODUCTION FOR THE 1983 CROP YEAR TOTALED 239 MILLION POUNDS, 7 PERCENT LESS THAN THE PREVIOUS YEAR AND 5 PERCENT BELOW THE 10 YEAR AVERAGE OF 251 MILLION POUNDS. THE APPLE AND PEACH CROPS WERE BOTH RATED IN FAIR CONDITION THROUGHOUT THE GROWING SEASON.

APPLES: THE 1983 APPLE CROP OF 220 MILLION POUNDS (5,238,000 42 - LB. EQUIVALENTS) WAS 8 PERCENT LOWER THAN THE 1982 APPLE PRODUCTION, BUT 10 PERCENT ABOVE THE 1981 FIGURE. LABOR PROBLEMS DURING THIS YEAR'S APPLE HARVEST CAUSED 4 MILLION POUNDS OF FRUIT TO GO UNPICKED, LEAVING 216 MILLION POUNDS OF UTILIZED APPLE PRODUCTION.

THE UTILIZATION BREAKDOWN FOR THE 1983 APPLE CROP CONSISTED OF 57.9 MILLION POUNDS OF FRESH MARKET SALES OR 26 PERCENT OF PRODUCTION. THIS COMPARED TO FRESH SALES OF 87.2 MILLION POUNDS FOR THE 1982 CROP. THE DROP IN FRESH APPLES SOLD WAS DUE TO DOWN SIZED FRUIT WHICH HAS LESS CONSUMER APPEAL. THE REMAINING 158.1 MILLION POUNDS WERE USED IN PROCESSING WITH 103.4 MILLION POUNDS CANNED, 11.7 MILLION POUNDS FROZEN, 40.5 MILLION POUNDS FOR JUICE AND CIDER, AND 2.5 MILLION POUNDS FOR OTHER USES.

THE VALUE OF APPLES PER POUND DECREASED 18 PERCENT FROM LAST YEAR TO 7.70 CENTS. THE LOW PRICE RECEIVED, IN SPITE OF DECREASING PRODUCTION, WAS DUE TO A HIGH PROCESSING PERCENTAGE OF POOR QUALITY APPLES. THE VALUE OF TOTAL PRODUCTION WAS $16,671,000, 26 PERCENT BELOW THE 1982 FIGURE.

PEACHES: THE 1983 PEACH CROP OF 19 MILLION POUNDS (396,000 48 - LB. EQUIVALENTS) WAS AN INCREASE OF 12 PERCENT FROM 1982 AND 5 PERCENT LOWER THAN IN 1981. THE PRICE PER POUND DROPPED 41 PERCENT FROM LAST YEAR TO 13.8 CENTS. THEREFORE, THE VALUE OF TOTAL PRODUCTION FELL TO $2,626,000, A DROP OF 34 PERCENT FROM 1982.

1983 HONEY PRODUCTION

Honey yield per colony for West Virginia averaged 29 pounds. The average price received for both wholesale and retail honey sales was $0.95 per pound. Wax per colony averaged 0.5 pounds. The average price of beeswax totaled $1.66 per pound. Honey stocks on hand for sale is 23 percent of production as of January 1, 1984. Based on the State Apiarist's estimated 4,500 beekeepers, the number expand to the following:

Honey production - 870,000 pounds
Number of Producing Colonies - 30,000 colonies
Value of Honey - $826,500
Honey Stocks - 200,100 pounds
Beeswax Production - 15,000 pounds
Value of Beeswax - $24,900

This past year was a poor year for honey production in West Virginia due to weather conditions. Many operators reported having very few colonies that produced honey. The number of colonies for 1983 represent only colonies from which honey was taken.
